Will Blow in Today. The new 100-ton furnace at the Penn-plyania smelters will be blown in this norming, and it is highly probable that selvania smeiters with the selvania smeiters will be closed down awaiting an increase in the order two smaller ones will be closed down awaiting an increase in the ore supply. With the large smeiter the works will be able to take care of all the ore now coming in with case at a considerable reduction in the cost of operation. This improvement, which was made by the company without any noise, would, under ordinary conditions, represent an outlay of in the neighborhood of 315,000.

On account of the slowness of the ore movements the smelters are not increasing their capacities. At the Hanauor the three stacks—one on matte and the others on ore, are being operated and the Germania has but two macks in operation.
